

**SOUTH BAY PATHOLOGY SOCIETY**

**CASE ACCESSIONS**

**WEB SITE: SOUTHBAYPATH.ORG**

**Garden Court Hotel  
Cowper Street  
Palo Alto, CA**

FOR THE MEETING ON AUGUST 7TH, 2017

**SB 6181 Mala Adhikari; Kaiser Santa Clara**

27-year-old woman with 8.4cm complex cystic and solid ovarian mass on ultrasound.

**DIAGNOSIS:** \_\_\_\_\_

**SB 6182 Walden Browne; Kaiser Oakland**

53-year-old man with diarrhea. Colon biopsy performed to rule out microscopic colitis.

**DIAGNOSIS:** \_\_\_\_\_

**SB 6183 Megan Troxell; Stanford**

62-year-old diabetic woman with nephrectomy for clear cell RCC; non-neoplastic kidney section submitted. Creatinine rose from 1.1 to 2.0 after surgery.

**DIAGNOSIS:** \_\_\_\_\_

**SB 6184 Greg Rumore; Kaiser Walnut Creek**

51-year-old woman with posterior thigh cyst.

**DIAGNOSIS:** \_\_\_\_\_

**SB 6185 Nabeen Nayak; Sir Ganga Ram Hospital, New Dehli**

A 34-yr-old woman was referred to the Gastroenterology service because of lower abdominal pain and constipation for 5 days with no other comorbidity. Except for some lower abdominal fullness, routine physical examination and investigations revealed no significant abnormality. Thoraco-abdominal CT scans showed an ill-defined mass 10x9.6 cm in right pelvis inseparable from that side ovary. Diagnostic laparoscopy showed abdominal caking and some hemoperitoneum in that area adherent to right ovary with nodules (? metastatic) in lower omentum. Multiple biopsies were taken.

**DIAGNOSIS:** \_\_\_\_\_

**SB 6186 Sunny Kao; Stanford**

80-year-old man with bladder tumor for TURBT.

**DIAGNOSIS:** \_\_\_\_\_

**SB 6187 Ankur Sangoi; El Camino Hospital**

53-year-old woman with polypoid endometrial mass, invading inner myometrium; staging lymph nodes were negative. Sections from the hysterectomy submitted.

**DIAGNOSIS:** \_\_\_\_\_

**SB 6188 (scanned slide available) Ankur Sangoi; El Camino Hospital**

62-year-old man with BPH. TURP performed.

**DIAGNOSIS:** \_\_\_\_\_

**SB 6189 (scanned slide available) Ankur Sangoi; El Camino Hospital**

67-year-old woman with endometrial biopsy.

**DIAGNOSIS:** \_\_\_\_\_

**SB 6190 (scanned slide available) Ankur Sangoi; El Camino Hospital**

38-year-old woman with radical hysterectomy for cervical cancer. Pelvic sentinel lymph node biopsy submitted.

**DIAGNOSIS:** \_\_\_\_\_

The South Bay Pathology Society is accredited by the Institute for Medical Quality/California Medical Association (IMQ/CMA) to provide continuing medical education for physicians.

The South Bay Pathology Society designates this live activity for a maximum of 1 *AMA PRA Category 1 Credit™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity. "For physicians participating in Maintenance of Certification (MOC) through the American Board of Pathology, CME credit hours can be converted to Self-Assessment Modules (SAMs) credit hours upon successful completion of a post-activity test with a passing rate of 80% correct answers."
