

South Bay Pathology Society

Cases for the meeting on November 4th, 7pm

Garden Court Hotel • 520 Cowper St, Palo Alto, CA 94301 [map](#) southbaypath.org

19-1101 Nabeen Nayak; Sir Ganga Ram Hospital, New Delhi

38-year-old male presented with intermittent colicky abdominal pain, loose motions, and weight loss over a 3-month period. He had similar complaints years earlier for which empirical anti-tubercular therapy was instituted to which he responded after 9 months. Present colonoscopy showed ileal nodularity, CT enterography revealed thickening and dilatation of lower CBD as well as mild dilated IHBR with prominent ileal folds. HIV Elisa was negative. Jejunal biopsy done.

Diagnosis: _____

19-1102 ([scanned slide avail](#)) – Sava Grujic; Kaiser San Jose

58-year-old male with bladder tumor.

Diagnosis: _____

19-1103 – Chris Hansen; CHOMP

71-year-old female presents with post-menopausal bleeding. TAH/BSO performed.

Diagnosis: _____

19-1104 - Romain Cayrol/Saman Ahamadian/Hannes Vogel; Stanford

14-year-old left-handed male with 11-year h/o medical refractory epilepsy. He currently has 0-20 seizures per day. EEG demonstrates a left frontal epileptogenic focus.

Diagnosis: _____

19-1105 – Dennis Adams/Greg Charville; Stanford

75-year-old female who presented with an enlarging vertex scalp mass. MRI revealed 2.4 x 3.2 x 3.4cm mass centered in the right parietal calvaria/scalp eroding the inner/outer table.

Diagnosis: _____

19-1106 – Ankur Sangoi; El Camino Hospital

72-year-old male with biopsy-proven pT1 urothelial carcinoma, undergoes radical cystectomy. Away from the biopsy bed, a firm nodule was found in the bladder wall.

Diagnosis: _____

19-1107 – Natalie Patel; El Camino Hospital

29-year-old male presents with anemia. Found to have ulcerated gastric lesion, biopsied.

Diagnosis: _____

19-1108 – Tyler Janowski/Sarah Umetsu; UCSF

58-year-old male with h/o chronic kidney disease, on dialysis, presents with dysphagia and noted to have a thickening of the distal esophagus on CT. Biopsy performed.

Diagnosis: _____

19-1109 – Ankur Sangoi; El Camino Hospital

Middle-aged male presents with hematuria. Cystoscopy with biopsy of red lesions performed.

Diagnosis: _____

19-1110 – ([scanned slide avail](#)) Ankur Sangoi; El Camino Hospital

Middle-aged male undergoes nephro-ureterectomy. Gross examination reveals unusual 2cm granular area in the upper pole of the renal pelvis.

Diagnosis: _____

About CME

The South Bay Pathology Society is accredited by the Institute for Medical Quality/California Medical Association (IMQ/CMA) to provide continuing medical education for physicians.

The South Bay Pathology Society designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

For physicians participating in Continuing Certification (CC) through the American Board of Pathology, this activity meets requirements for both Lifelong Learning (Part II) and Self-Assessment Module (SAM) credit hours (upon successful completion of a post-activity test with a passing rate of 80% correct answers).
