

South Bay Pathology Society

Cases for the Zoom meeting on June 3, 2pm
(instructions will be emailed to paid members list!)

southbaypath.org

20-0601 – Caroline Temmins; Santa Clara Valley Medical Center

44-year-old M with h/o left testicular MTB, status post orchiectomy and right testicular MTB, with recent trip to India and 2-hour lay-over in Hong Kong. Presents from home with 1 day of cold-like symptoms and progressive altered mental status.

Diagnosis: _____

20-0602 – Joe Rabban; UCSF

43-year-old F with an early 1st trimester spontaneous miscarriage. She underwent uterine aspiration. Gross examination showed normal chorionic villi without fetal tissue. The morphologic findings were deemed abnormal and DNA genotype testing was performed to exclude an early molar pregnancy. The test showed diploid genotype but the chorionic villi did not contain any of the alleles present in the maternal decidual tissue.

Diagnosis: _____

20-0603 – Joe Rabban; UCSF

30-year-F with an early 1st trimester miscarriage. She underwent uterine aspiration. The clinician sent part of the specimen for fetal aneuploidy testing and the remainder for surgical pathology evaluation. Gross examination showed normal chorionic villi; no fetal tissue. The fetal test result was triploidy (69, XXY).

Diagnosis: _____

20-0604 – Karen Matsukuma; UC Davis

68-year-old M, past medical h/o CVA and Afib, on apixaban and aspirin. Presents to ED for melana. EGD: 2cm area with adherent material (thought to be food residue) noted in proximal body of stomach. The underlying erythematous mucosa was biopsied. Esophagus/duodenum were normal.

Diagnosis: _____

20-0605 – Laura Brown/Yi Xie; UCSF

66-year-old M with h/o Hep B presents with diffuse lymphadenopathy and B-symptoms. Undergoes bone marrow aspirate/biopsy.

Diagnosis: _____

20-0606 – ([scanned slide avail](#)) Ankur Sangoi; El Camino Hospital

75-year-old-M with BPH and bladder neck lesion, transurethral resection of bladder/prostate performed.

Diagnosis: _____

20-0607 – Justin Kurtz/Serena Tan; Stanford

3-month-old ex-full term F with several episodes of pulseless ventricular tachycardia and acute global left ventricular failure. Heart catheterization showed diffuse narrowing of the coronary arteries, and abdominal CT showed opacifications of the splenic and mesenteric vessels. She underwent an orthotopic heart transplant.

Diagnosis: _____

20-0608 – Connie Chen/Josh Menke; UCSF

68-year-old M with a finger mass.

Diagnosis: _____

Ankur Sangoi, MD asangoi2@yahoo.com

El Camino Hospital

Dept of Pathology, GC-33

Mountain View, CA 94040

CME Co-Chairs

Kristin Jensen, MD kjensen1@stanford.edu

VA Palo Alto, Stanford Pathology

Megan Troxell, MD megant@stanford.edu

Stanford Pathology

Please contact the registrar to submit cases of interest for future meetings.

About CME

The South Bay Pathology Society is accredited by the Institute for Medical Quality/California Medical Association (IMQ/CMA) to provide continuing medical education for physicians.

The South Bay Pathology Society designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

For physicians participating in Continuing Certification (CC) through the American Board of Pathology, this activity meets requirements for both Lifelong Learning (Part II) and Self-Assessment Module (SAM) credit hours (upon successful completion of a post-activity test with a passing rate of 80% correct answers).
